CAREER OBJECTIVE

To be able to utilize the technical knowledge gained, in a responsible and proper manner resulting in value addition to the organization and to reach the apex of my career in the process.

PROFESSIONAL SUMMARY

I'm Nagabhushana Raju S, an undergraduate 7th-sem student pursuing Computer Science and Data Science Engineering at MIT Mysore. I have a strong grasp of theoretical concepts and solid programming fundamentals, which help me analyze and approach problems effectively. My academic journey has given me exposure to areas like machine learning, full-stack web development, and data visualization, strengthening both my technical and analytical skills. I am also conscious of the importance of sustainable and green technology solutions, and I actively seek opportunities to expand my knowledge while contributing to meaningful, future-focused projects. With a passion for innovation and impact, I aspire to become an ultra-successful entrepreneur and build transformative ventures, with the long-term vision of creating lasting value and achieving billionaire status through purpose-driven success.

EDUCATION

- Bachelor of Engineering B.E. – Computer Science & Engineering (Data Science)
| Maharaja Institute of Technology Mysuru MITM, under VTU | (June/July 2026 Expected Graduation)
| Current Status: 7th Semester Ongoing | CGPA 7.2 @6th-sem Improved from 6.6 - demonstrating consistent upward trend)
- Pre-University(PUC) | Manasarowara Pushkarini Vidhyashrama Pre-University College, Mysuru| Science[PCMB]
| Completion: Jun 2022
- Schooling (10th Standard) |Purna Chetana Public School, Mysore | CBSE | Completion: Jul 2020 |

TECHNICALSKILLS/COMPUTERPROFICIENCY

❑ Programming & Web Development

Languages: Python, Java, C, C++, R (Basics)

Web Technologies: HTML, CSS, JavaScript

❑ Data Science & Visualization

Core Concepts: Machine Learning Algorithms, Exploratory Data Analysis (EDA), Advanced Data Analysis (ADA)

Tools: Power BI, Tableau, Excel, Data Visualization

❑ Databases & Big Data

Databases: SQL, MySQL, MongoDB, DBMS

Big Data: Data Warehousing, Big Data Analytics (BDA), Hadoop (HDP Sandbox basics: Yarn, Pig, Hive, Scala)

❑ DevOps, Version Control & Environments

Concepts & Tools: DevOps (Jenkins, Docker - basics), Git, Version Control

Environments: Anaconda3 (conda/mamba), Kaggle Hub

❑ Specialized Skills

Prompt Engineering: Advanced prompt scripting, leveraging latest LLMs & Agents, AI tools

Performance: Parallel Programming (OpenMP), GPU leveraging

Networking: Computer Networks & Protocols

❑ Tools, Platforms & Operating Systems

Platforms: GitHub, Kaggle, Streamlit, LinkedIn

IDEs: VS Code, Visual Studio, JetBrains Suite, Eclipse, Jupyter (Notebook & Lab)

General Tools: MS Office Suite, CAD, Electronic Workbench

Operating Systems: Windows, Ubuntu, WSL, Kali Linux (basics)

❑ Soft Skills

Problem Solving | Teamwork & Management | Leadership | Effective Communication | Project Management
| Adaptability | Time Management

❑ Personal Skills/Strengths:

Adaptable, self-motivated, good grasper, fast learner, cool minded, commitment towards work, ability to deal with people, problem solving abilities, workaholic, amiable in nature, jovial.

ADDITIONAL QUALIFICATION / ACHIEVEMENTS / CERTIFICATIONS / TRAININGS

- ✓ Technical Workshop on Data Science | Apr 2025
--Indian Institute of Technology Hyderabad (IIT-H) | In Association with Elan & envision
- ✓ Data Analytics Using Power BI – 30 Day Intensive | Apr 2025 – May 2025
--TechTip24/Skill Course E-Learning Platform | Mumbai, India
--Comprehensive Power BI training covering advanced data visualization and business intelligence techniques.
- ✓ Microsoft Excel Using AI Workshop | Oct 2024
--BE 10x | QM Office Master
--Advanced Excel automation using AI, mastering 200+ formulas and rapid dashboard creation.
- ✓ Computer Applications & Programming in C | Jul 2022 – Sep 2022
--Indian Institute of Computer Technology (IICT) | Guru Raghavendra Computer Training Center
--Foundational certification covering Computer Concepts, MS Office Suite, and C Programming.
- ✓ Placement Training on AIML & Data Analytics | 2025
--Tejas PRO
--Hands-on training focused on Artificial Intelligence, Machine Learning, and Data Analytics concepts with real-world applications.
- ✓ Eco-Technology ML modeling & Data Analysis Training | 2025
--Skills4Future
--Awareness of sustainable and green tech practices.
- ✓ AI Using Python Mastery Course (Ongoing)
--Be10X

EXPERIENCE

- Getskilled (A unit of GyaanKool Research labs) | Software Development Intern | Apr 2025 - Aug 2025
 - ❑ My first internship was a transformative experience, offering both technical depth and collaborative exposure.
 - ❑ We worked in a hybrid setup, with weekly on-site visits and daily virtual meetings, which helped me stay closely aligned with the team's goals.
 - ❑ We engineered data pipelines for multimodal inputs, leveraging ResNet for medical imaging and BERT for clinical text.
 - ❑ We then implemented and benchmarked fusion models to optimize diagnostic precision across modalities.
 - ❑ Thereby successfully developing a multimodal ML system for early disease detection

MINI PROJECTS

✓ Expense Tracker Web App | Mar 2025 – Apr 2025 | My Laptop

I built a responsive web app for real-time income and expense management, featuring interactive data visualization and persistent local storage. The intuitive, mobile-friendly interface allows users to track spending habits and maintain a monthly budget effortlessly.

✓ Ola Electric Clone | Feb 2025 – Feb 2025 | My Laptop

I created a full-stack clone of the Ola Electric platform, replicating key user features like scooter bookings, service scheduling, and charging station locators. The project includes a complete admin panel for backend order and vehicle management.

✓ Real-Time Sign Language Interpreter | Jun 2024 – Feb 2025 | My Laptop

I built a real-time sign language interpreter using a multi-modal AI pipeline with MediaPipe for landmark detection and a DNN for facial analysis. The system leverages a multi-threaded Python backend to process a live webcam feed and stream results to a JavaScript frontend with dynamic UI overlays.

✓ Early Disease Predictor | Python, Flask, scikit-learn | GitHub & My Laptop | 2025

We developed a machine learning system designed for the early detection of diseases by analyzing patient-reported symptoms. For this project, we engineered the predictive model using Python and scikit-learn and served it through a user-friendly web interface built with the Flask framework.

ADDITIONAL INFORMATION

➤ Hobbies & Interests:

Sports: Playing Cricket, Football, Tennis, Carrom, Chess, Badminton, and Swimming.

Creative: Singing and listening to music.

➤ Languages:

Fluent in English, Kannada, Hindi, and Telugu.
